DETAILED ACTION

Response to Amendment

The Amendment, filed on February 25, 2005, has been entered and acknowledged by the Examiner.

Cancellation of claims 1-18 has been entered.

Claims 19-24 are pending in the instant application.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 19-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 19 recites the limitation "developing the layer of dielectric material into which the imaging paste is diffused to remove unexposed portions of the dielectric material and to leave exposed portions of the cathode electrode, wherein a plurality of cathode electrodes separated by a dielectric material are formed". The specification fails to disclose the subject matter as claimed, more specifically, the specification discloses "A layer of the Diffusion Patterning™ dielectric 3 is printed as shown in FIG. 1(c) and is then dried. Diffusion Patterning™ imaging paste 4 is then screen printed onto the Diffusion Patterning™ dielectric 3 in a pattern corresponding to the portions of the dielectric material 3 that is to be removed as shown in FIG.

Art Unit: 2879

1(d). The patterned imaging paste 4 is then heated to effect diffusion of the imaging paste 4 into the portions 5 of the dielectric 3. The portions 5 of the dielectric layer 3 are then washed away with water leaving exposed lengths of cathode electrode as shown in FIG. 1(e).", accordingly the removed portions are those where the imaging paste is diffused into the dielectric layer and not the unexposed portions of the dielectric layer as stated in claim 19. For the reasons stated above, claims 19-24 are rejected as failing to comply with the written description requirement.

Response to Arguments

Applicant's arguments with respect to claims 19-24 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
